

Guidance on Assessing Series 3 Internal Assessment Activities (IAAs) using the Generic Assessment Grid.

FREE Live Online Training for GCSE Science, Additional Science, Biology, Chemistry and Physics

We appreciate that it was not possible for some centres to attend the face to face update meetings held in November, December or January. With this in mind we have organised this FREE online event, where we will be looking at the third series of IAAs and providing guidance on using the generic assessment grid to assess Internal Assessment activities (IAAs).

OCA requested significant changes to Internal Assessment Activities (IAAs) in 2007. As a result, the current new series 3 IAAs incorporate *How Science Works* and have no mark schemes. These update meetings provide vital guidance on assessing the new IAAs

The events will enable delegates to:

- consider the management and practicalities of the Third series of IAA's
- apply the assessment grid to exemplars of the Third series of IAA's
- find out more about the Consultancy service for internal assessment
- provide information about further support services for Science

The event will be delivered by Richard Shewry (Chief Examiner)

Our high quality online training offers you the opportunity to train the whole department by booking a single place (to find out more, enquire while booking), the 4pm start means that teachers do not have to miss lessons and online events are also more cost effective (no travel cost or supply teacher cost)

Participating in online training sessions is a simple process. Prior to the event you will be sent an email with a web link to check that your PC is capable of running the event and a link to the virtual training room. Please ensure that your PC is sound enabled and you are advised to log-in to the event 15 minutes before the start. This is so we can make sure any potential connection problems can be resolved before the training. In the training room you will be able to see the presentation, hear the presenter and ask questions and chat with other teachers through the onscreen chat window. If possible, all questions will be answered live, if not you will receive an answer to your question/s after the event. To participate in this training session please do one of the following using the event details below:

- email trainingbookings@edexcel.org.uk
- book using the online form on the Edexcel website www.edexcel.com/training
- call the dedicated GCSE enquires team on 0844 576 0027

When booking, please quote the event code, your name, centre name and centre number.

(There are limited spaces on this event so booking is on a first come first served basis, please book early to avoid disappointment)

Date and Time	Event	Code
Thursday 19 th March 09 16:00pm (GMT)	GCSE Science: Guidance on Assessing Series 3 Internal Assessment (IAAs) using the Generic Assessment Grid.	8OSM12/01

This online event is a repetition of update events and will be based on the materials used during the November, December and January events. A recording of the event will be placed on the website as further support to centres on the IAA.
