

## 573 Incident Management Level 5

This AOC covers the management and handling of incidents or events from a communications centre or control room.

This AOC applies equally to a range of organisations including:

- the emergency services (ambulance, fire, police etc)
- public utilities (electricity, gas, water etc)
- security providers (eg for sports or entertainment events).

Incidents and events are defined as occurrences which could give rise to emergency situations or threats to public safety or property. They will require the deployment and control of a range of resources whose activities need to be co-ordinated.

Incidents will generally arise with little or no prior warning while typically events will be the subject of significant preplanning. The term incident is used below as shorthand to include events.

Also covered is the ongoing monitoring of the incident together with post operational review and analysis.

At level 5 there will be overall direction of incident management within the organisation.

The competent person can:	This will involve applying the following <i>knowledge and understanding</i> :	This will involve effective use of the following <i>skills and techniques</i> :
<p>Level 5</p> <p>Direct the management of incidents.</p>	<ul style="list-style-type: none"> <li>• what organisational procedures for incident management are required</li> <li>• content to be included in organisational procedures for incident management</li> <li>• what resources and communication systems are required to manage incidents.</li> </ul>	<ul style="list-style-type: none"> <li>• creating and implementing organisational procedures for incident management</li> <li>• ensuring compliance with organisational procedures for incident management and handling</li> <li>• reviewing and updating organisational procedures for incident management</li> <li>• developing the organisational strategy for incident management.</li> </ul>

## 573 Incident Management Level 5

This unit record contains cross-reference grids for evidence and whole unit feedback and signoff sheet

Detail reference	Knowledge and understanding of:	Type of evidence	Evidence reference	Evidence location	Assessor signature with date	IV signature with date
1	<p>What organisational procedures for incident management are required.</p> <p>The procedures laid down by the organisation for managing incidents. ### Notes:

1. Assessment guidance for this unit is available as a separate file.
2. This form can be used as a printed file that is completed by hand. Alternatively it can be completed electronically (recommended). If used electronically it can then either be transmitted electronically or printed when complete and signed in the normal way. Files sent electronically can only be accepted if the centre has confirmed the validity of electronic signatures and secure email addresses for those concerned. Before claiming certification, assessors and centres must be confident that the evidence is authentic and candidates must sign and date an **Authenticity of Evidence** in the normal way before unit achievement can be claimed.
3. For **Type of evidence** please use the following set of codes or combination of codes:  
**E** = Product evidence, **O** = Observation, **P** = Personal Statement, **WS** = Witness Statement, **S** = Simulation, **PD** = Professional Discussion, **APA** = Accreditation of Prior Achievement, **Q&A** = Questions and Answer.
4. If you do enter information to this form electronically, change format accordingly and store as another file using an appropriate naming convention eg your name, 573 Incident Management Level 5 .doc. You must also ensure that backups are made.
5. Facility is provided for verification by competence detail or by whole unit. The verifier may choose to verify tasks that cover a number of units by marking each competence detail individually.
