Assessment Object	Moderator Comments	Mark Band
A01	No project proposal form as been included by the learner. The actual project is teacher led, an activity log has been included although it is brief in places. Overall, the evidence submitted only provided some evidence to reflect the requirements of this assessment objective and therefore sits in low mark band 1	1
A02	The learner has obtained secondary sources of information only and therefore this work sits in MB1. A clear bibliography is provided with retrievable websites. The information gathered and sources used are relevant to and applied to the project outcomes. Overall the evidence reflects the requirements of MB1	1
A03	Information is developed that shows understanding of the project. Throughout the body of the project, the focus of the discussion is recent incidents concerning dogs and the reason why dogs may attack and	1

	the safety aspects as the project title suggests are implied. The key issue here is, the learner's project title is not clear. There is little evidence of supporting arguments and consideration of alternative viewpoints.	
A04	The learner has not stated which project objectives have been met but reasons are not given for the success or lack of it. There is no actual assessment of how well the project went and there are no ideas for follow up work in the same or other related areas. However, there is some indication of what the learner has learnt in the conclusion.	1
