<p>Some possible materials and techniques have been investigated. There is some referencing of research sources and a bibliography is included, listing most of the sources.</p> <p>From the research carried out, information and resources have been selected for use in the project although some of this may not be not directly relevant. Information has been collated in reference to the project. There are attempts to establish links between the research carried out and the project, although some of these may be tenuous.</p> <p>Some understanding of the less complex areas of the resources and research required for the development and production of the artefact has been shown.</p>	<p>A range of different types of materials and techniques have been investigated. Artefact: AO3 – Develop and realise

<p>An attempt has been made to structure the supporting information that relates to the development process. The information contained within it is <b>generally presented</b> in a logical order, <b>although some of it may not be wholly relevant</b>.</p> <p>The learner demonstrates <b>limited</b> understanding of the developmental process. There is <b>some</b> evidence of development of ideas and that alternative ideas and approaches have been <b>considered</b>, with <b>some attempt to explain</b> the decisions taken, eg relating to choosing the most appropriate materials, processes, techniques, design.</p> <p>There is <b>some</b> evidence that the artefact has been refined during the developmental process. Resources and skills are applied <b>with some success</b> in creating the artefact. The artefact goes <b>some way</b> towards fulfilling the original brief.</p>	<p>The supporting information that relates to the development process is <b>structured and presented clearly</b>. <p>Overall the learner shows <b>some self-awareness</b> when evaluating the project and the extent to which they have achieved their aims and met the original brief. The learner <b>attempts to</b> assess how well they managed at different stages, although the learner’s assessment <b>may not correspond with</b> the tutor-assessor’s own judgement.</p> <p>The learner <b>identifies</b> some <b>basic</b> ideas for what they could do differently next time. They have drawn <b>basic</b> conclusions about the process of producing an artefact that could help them in future.</p> <p>The presentation is <b>structured</b> so that the <b>audience can see that there has been some attempt to organise it logically</b> and the learner shows <b>basic</b> ability to convey the main ideas.</p> <p>If an oral presentation is given, it is <b>generally audible</b>, although it is likely that the learner <b>relies heavily</b> on supporting materials, eg notes or cue cards. The learner shows <b>limited ability to engage the audience</b> or hold their attention. Where visual aids are used, these <b>attempt to support</b> the presentation, <b>although they may not be clearly visible</b> to the audience and <b>may contain too much information</b>.</p>	<p>Overall the learner shows <b>good insight and self-awareness</b> in evaluating the project and the extent to which they have achieved their aims and met the original brief. Assessment Object	Moderator Comments	Mark Band
A01	<p>The centre reports that the candidate needed very limited guidance in choosing their research question. The question itself does not seem to have been refined or developed particularly. However, there is evidence that the candidate has given the question a reasonable focus (see the introduction and activity log, where the candidate decides to focus on the logical form of the problem of evil). Elements of band 2, and some from 3 are present.</p> <p>The log is clear (though not at all points) and sometimes detailed; this element fits into band 2.</p> <p>The project proposal form is clear and very concise. A list of activities is given in an appropriate order but without much description. There is evidence of progress being monitored in the log. This element is low band 2</p> <p>Best fit overall is mid band 2</p>	2
A02	<p>An impressively wide range of sources, referenced and with an appropriate and consistent bibliography: strong band 3, here.</p> <p>Careful selection, with consistent relevance, excellent analysis and synthesis of source material into coherent narratives. Extremely thorough understanding shown throughout, as well as awareness of the wider context. All this is strong mark band 3. The only weakness is the limited evaluation of source reliability.</p>	3
A03	<p>Overall, the structure of the work is clear though it would have been stronger had there been a clearer distinction between a review of literature and a discussion section. Nevertheless, the division into major philosophical and psychological sections is appropriate, and there is a coherent link made between them in the introduction to the second section. Mark band 3 is indicated.</p> <p>Logical structure is maintained throughout. Language use is slightly variable: at times, it is excellent, with a good academic register. At other points, grammatical errors do interfere with communication. This element is low mark band 3.</p> <p>The content of the dissertation shows impressive understanding, and strong lines of argument are developed, together with consideration of and response to counter-argument. This is a strong indicator of a high mark band 3 position. The conclusion too shows proficiency in summarizing the line of argument. It shows sensitivity to wider implications.</p> <p>Overall, a position high in mark band 3 is justified here.</p>	3
A04	<p>There is evidence of a strong presentation. The evidence of written evaluation of the project process is a little weaker. There is clear self-awareness - e.g. about how philosophy is a subject to which the candidate is well suited. Clear conclusions have been drawn about the research process but there is little on limitations of the research methodology and little about possible extensions or alterations that would be made if a new project were to be begun. The written evaluation would fit best in mark band 2; the presentation, on the centre's evidence, is</p>	3

	mark band 3. A best fit mark of low band 3 is suggested.
